RE: VCBR Parking Lot Opening and 360 Closure

On December 11th, staff and visitors will begin using the new parking lot at VCBR. The existing parking lot will be closed and be given over to construction for demolition.

The 360 entrance will be closed to traffic. It will function as a construction entrance only. All staff and visitors for VCBR will need to come in the 460 entrance. As you come through campus, you will pass building 29 on your right and make a right turn onto the new Crepe Myrtle road to enter the parking lot.

The visitor entrance and employee entrances will continue to be accessible.

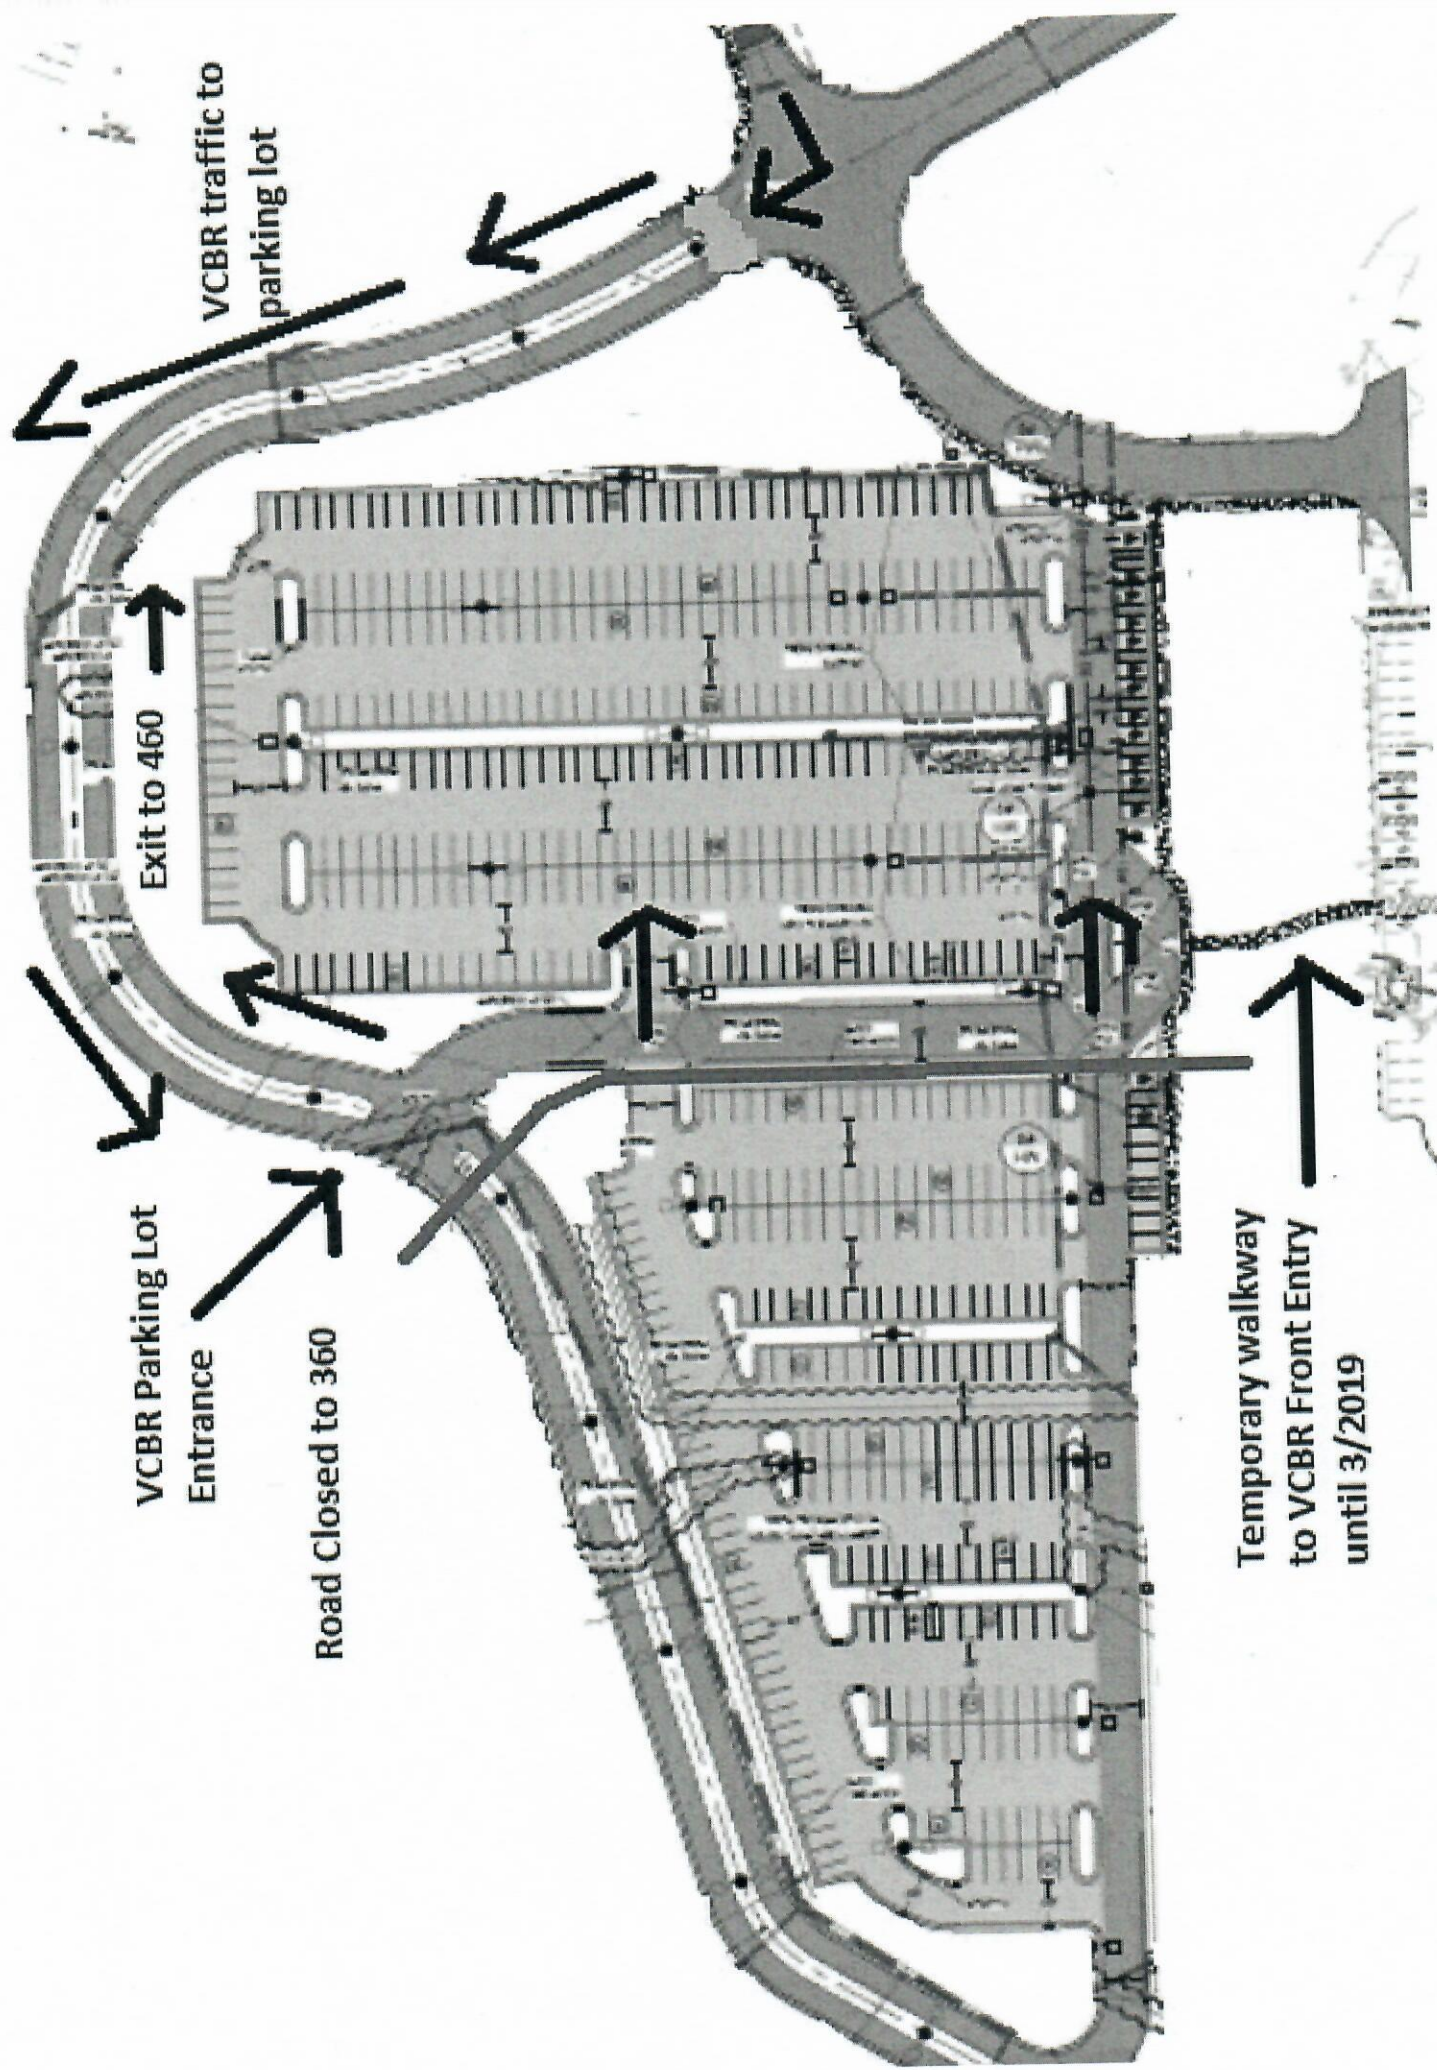

Please refer to the attached drawing as the new parking lot will have some designated spaces matching what we have now. Visitor parking is marked on the asphalt; these will be relocated when the other side of the parking lot is release to us at the end of construction.

Because of the streamline repair project, walking paths between PGH and VCBR will be in place to provide a safe designated space for those that walk. VCBR fleet vehicles will be moved to the old AOW and handicapped parking spaces temporarily until this section goes under construction. Staff should not park in these spaces.

Please alert friends, family, vendors, contractors and any deliveries that typically come to front entry of the changes.

Please allow additional time the week of the 11th to get familiar with new traffic patterns and routes of travel. Please also be safe.
